Gas conditioning systems

When Selecting an Installer

Focus on Energy recommends that you interview potential contractors. Questions that you may ask include:

- Can you provide references from previous customers with similar systems?
- When would you be able to perform the work?
- How long will the project take?
- Do you provide a performance guarantee and/or warranty, and if so, what are the details?
- How many similar systems have you installed?
- Have you worked with local building officials and utility representatives when installing similar systems in the past?
- Do you have a master electrician (or professional electrical engineer) as part of the project team?
- Will you hire subcontractors to complete portions of the project? What firms will you hire and what will they do?
- Do you repair systems that you installed, and if so, what are your rates?
- What kind of training will you provide me with so that I can better operate and maintain my system?

Get on the Full Services List for Industrial & Municipal Anaerobic Digester or Update Your Listing

We encourage full service renewable energy firms doing business in Wisconsin to be included in the Industrial & Municipal Anaerobic Digester service list. To request to be included in the list or to update or correct information provided, contact: Larry Krom at 608.588.7231 or lk@wisolarelectric.com.

Focus on Energy is a public-private partnership offering energy information and services to energy utility customers throughout Wisconsin. The goals of this program are to encourage energy efficiency and use of renewable energy, enhance the environment, and ensure the future supply of energy for Wisconsin. **800.762.7077** focusonenergy.com
